PROFILE

Motivated and detail-oriented Django & Web Developer with strong skills in building full-stack web applications using Python, Django, HTML, CSS, Bootstrap, and SQL. Experienced in developing real-world projects including user authentication systems, admin dashboards, and database-driven applications. Passionate about learning new technologies, improving UI/UX design, and creating scalable, secure, and user-friendly web solutions. Seeking an opportunity to contribute to a growing organization while enhancing my technical and professional skills.

WORK EXPERIENCE

- Django Web Developer (Project-Based Experience)
 - Self Projects & Academic Projects | 2024 - Present
 - Designed and developed full-stack web applications using Django framework.
 - Implemented user authentication, role-based access, and admin dashboards.
 - Created responsive UI using HTML, CSS, and Bootstrap.
 - Integrated SQLite / SQL databases for storing and managing user data.
 - Fixed bugs, handled server errors (500 errors), and improved application performance.
 - Deployed projects on cloud platforms and managed GitHub repositories.
-

Smart Complaint Management System (Django Web App)

- Developed a system where users can submit and track complaints.
- Admin dashboard to manage complaints and user data.
- Features: Login system, complaint status update, category management.
- Technologies: Python, Django, HTML, CSS, Bootstrap, SQLite.
- AI Resume Analyzer Web Application
 - Built a web app to analyze resumes using basic AI concepts.
 - Implemented file upload and data processing features.
 - Used Python, Django, and basic machine learning integration.
 - CMS Website Project (Django)
 - Created content management features for articles and posts.
 - Admin panel for managing website content.
 - Improved UI design and navigation structure.
-

CERTIFICATIONS / LEARNING

- Currently learning Advanced Django and REST APIs
- Practicing Data Structures & Algorithms in Python
- Exploring AWS deployment and cloud hosting
